

The following two slides contain example questions for each of the two types of questions in this study. The first slide shows something a character knows and asks which of two other things the character might know. The second slide shows a picture of something and two drawings of it, and the child is asked which drawing would be more useful for a particular goal someone has.

Mary knows all about why a ball always falls down after you throw it up in the air

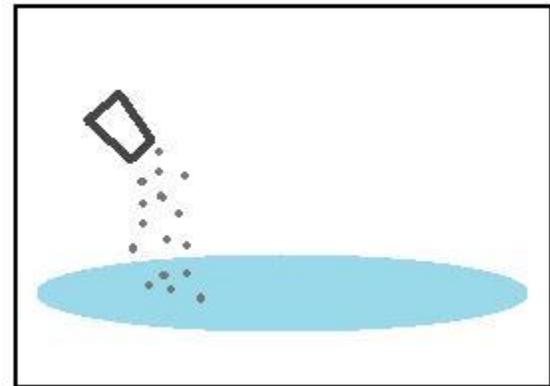

Do you think Mary knows more about:

Why magnets attract some things and not others:

OR

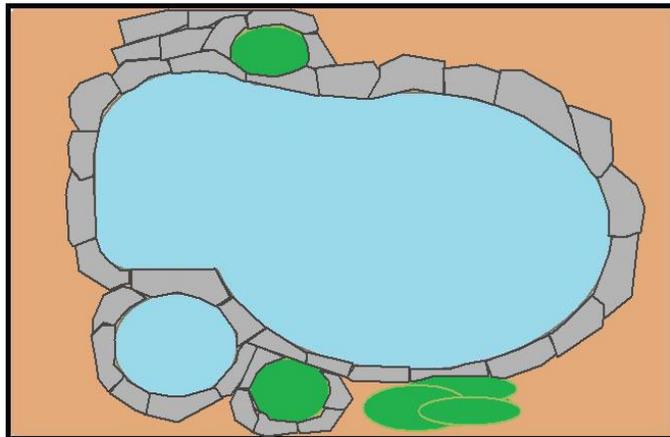

Why putting salt on ice makes the ice melt faster:

This is Mary's pool:

Which picture do you think would help Mary figure out whether it is safe to dive into her pool?

OR
